Subject: RE: Fentanyl Samples

Peter,
Couple of questions

- 1) what did you do last time?
- 2) Were there problems?
- 3) What are the advantages of this approach?
- 4) How will this impact the turnaround

Thanks, Julie

Subject: Fentanyl Samples

Julie/Chuck

For the EMT fentanyl samples that I'm working on, does anyone have any objections if I first screen the samples 50:50 (sample:methanol) and then evaporate the 50:50 so it can be re-dissolved in methanol for confirmation of the primary constituent?
